

I would like to urge you to reject petition 04-160. I currently only listen to satellite radio and do not watch TV. Without their coverage of local weather and traffic I would be left without this valuable service. Choices are good in the marketplace and my choice for these services is satellite radio. Too often content providers have failed to provide certain valuable services without a governmental mandate. In this instance the provider has chosen to do so of it's own free will and it would be ashame if that were stopped.
